

Yash Guard

yashguard2002@gmail.com | [LinkedIn](#) | [GitHub](#) | yashguard.in

Full Stack Developer with 2+ years of experience shipping production web and mobile applications end-to-end. Specialize in the MERN stack, Next.js, and TypeScript, with a strong instinct for building complete products from database schema to polished UI. Deeply interested in AI and LLMs; actively integrates OpenAI, LangChain, and n8n into real-world workflows.

EXPERIENCE

Full Stack Developer, (Empiric Infotech LLP)

Mar 2025 – Mar 2026 · Full-time · On-site

Working on client-facing projects involving frontend development, AI integrations, and modern web architectures.

- Developed strong client communication skills; handled requirement gathering, expectation management, and delivery coordination across multiple concurrent client projects.
- Delivered full SEO pipelines with Next.js SSR/SSG: dynamic sitemaps, OpenGraph, JSON-LD structured data, and Twitter cards.
- Integrated AI tools (OpenAI API, LangChain, n8n) into automation workflows; used Cursor and Claude for AI-assisted development and prompt engineering.

Full Stack Developer, (LogicGo Infotech)

Oct 2023 – Oct 2024 · Full-time · On-site

Built and shipped production modules for WalletSync ([walletsync.app](#)), a live SaaS budget planner with paying subscribers.

- Architected REST APIs with Express.js; integrated Razorpay, Firebase, AWS S3, and Cloudinary; implemented RBAC for 7+ user roles.
- Built real-time admin dashboards using Socket.io for live revenue and order tracking; managed deployments with Docker, Vercel, and Railway.
- Built a zero-dependency responsive dashboard using CSS Grid; developed 10+ widgets, multi-level sidebar, and accounts/labels/records modules with CRUD, filtering, and pagination.
- Integrated Google & Apple OAuth (Firebase), Stripe subscription webhooks, and AWS S3; developed 3 Next.js landing pages with dynamic sitemaps, OpenGraph, and Twitter cards.

PROJECTS

ElegantJewels – Jewellery E-Commerce Platform ([Live](#))

Tech: React, Vite, Redux Toolkit, Express.js, MongoDB, Socket.io, Razorpay, Cloudinary, Firebase, JWT, Bootstrap, ApexCharts

- Built a two-app platform (customer storefront + admin dashboard) with 14+ MongoDB models, a 7-role RBAC system, and 50+ REST API endpoints.
- Implemented multi-variant products (ring size, carat, metal type, purity), cost-per-material tracking, persistent cart with coupon validation, and a complete return/refund workflow.
- Integrated Razorpay checkout with failure-handling, Cloudinary image management, real-time admin revenue tracking via Socket.io, and a Quill-based Blog CMS with role-controlled publishing.
- Built appointment booking and video consultation scheduling modules; managed 7 user roles including seller, manager, content editor, and customer service.

WalletSync – SaaS Budget Planner & Expense Tracker ([walletsync.app](#))

Tech: Next.js, React, Vite, Redux Toolkit, Express.js, MongoDB, Stripe, Firebase, AWS S3, Bootstrap, ApexCharts

- Owned dashboard layout, Stripe billing (weekly, yearly, lifetime plans), and 3 Next.js marketing pages, all shipped to production with real paying users.
- Built accounts module with multi-currency support and archiving; labels and records modules with multi-column filtering, pagination, and search.
- Integrated Google & Apple OAuth, Stripe subscription webhooks, and AWS S3; implemented full SEO pipeline with dynamic sitemaps, OpenGraph, and Twitter cards.

Lace Inventory Manager – React Native Mobile App ([Post](#))

Tech: React Native, Expo, TypeScript, React Query, Google Apps Script (Sheets backend), Cursor AI

- Digitized 800+ handwritten lace inventory records for a textile business; built and shipped cross-platform (iOS, Android, Web) in under 8 hours using AI-assisted development.
- Features: instant design-number search, full CRUD, dynamic stone composition tracking, labour cost and selling price per entry, top-20 recently searched laces, smart duplicate detection, and light/dark/system theme support.

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Redux Toolkit, React Query, Framer Motion, shadcn/ui, React Native, Expo, Electron.js

Backend: Node.js, Express.js, REST APIs, GraphQL, WebSockets, Socket.io, Python, FastAPI, JWT, RBAC

Database: MongoDB, PostgreSQL, Redis, Prisma, Mongoose

Integrations: Stripe, Razorpay, Firebase, AWS S3, Cloudinary, Google OAuth, Apple OAuth, Razorpay Webhooks

AI & Automation: OpenAI API, LangChain, n8n, Prompt Engineering, RAG, NLP, Vibe-Coding, Cursor, Claude, Lovable

DevOps: Docker, Git, GitHub Actions (CI/CD), Nginx, Vercel, Railway, AWS, Linux

EDUCATION

Bhagwan Mahavir University

BCA – Information Technology

CGPA: 8.30 · Coursework: Web Development, Mobile App Development, Python, Java, C++, Databases, Shell Scripting

Surat, Gujarat

Apr 2022 – Apr 2025
